

“JusticeAI demystifies law and delivers it to every palm—empowering users to act, speak, and seek help without fear.”

PROBLEM

Challenges in Accessing Justice

- **Lack of Legal Awareness** – Many people are unaware of their rights and the protections available to them.
- **Complex and Costly Legal Processes** – Legal procedures are often difficult to understand, and professional help can be expensive or hard to access.
- **Low Trust in the Justice System** – People may hesitate to seek legal help due to doubts about fairness and reliability.

“When people don’t understand the law, they hesitate to seek help.”

SOLUTION

- **Bilingual AI Legal Assistant** – An AI-powered chatbot in Hindi and English to guide users on legal matters.
- **Simplified Legal Guidance** – Step-by-step support for filing RTIs, FIRs, and addressing other legal issues.
- **Accessible Support Network** – Directory of NGOs and free legal aid, available via WhatsApp, mobile, and web platforms.

KEY METRICS

- **Users Searched:** Total number of individuals who used the service.
- **Legal Queries Resolved:** Number of legal questions addressed.
- **Complaints Processed:** Complaints that were successfully filed.
- **Legal Aid Referrals Made:** Referrals successfully directed to legal aid services.

UNIQUE VALUE PROPOSITION

“JusticeAI makes legal rights simple and accessible for everyone.”

- ✓ Improves customer experience
- ✓ Automates responses
- ✓ Available 24/7

JusticeAI is a chatbot that explains legal rights in plain Hindi and English, helps users understand how to file complaints, and connects them with real legal aid services.

COMPETATIVE ADVANTAGES

- **Localized, Easy-to-Understand Legal Content:** Tailored to local laws and simplified for better understanding.
 - **Bilingual Support (Hindi & English):** Accessible to a wider audience across language barriers.
 - **Mobile-First & Low-Literacy Friendly:** Designed for smartphones and users with varying literacy levels.
- First AI chatbot for justice & strong institutions (SDG 16).

CHANNELS

- **Digital Platforms** – Engage users through WhatsApp and a dedicated mobile application.
- **Community Partnerships** – Collaborate with NGOs and colleges to reach more people.
- **Public Awareness Campaigns** – Promote services through social media to increase visibility and engagement.

CUSTOMER SEGMENTS

- **Rural & Low-Income Citizens:** People in villages and underserved communities who face challenges accessing legal information and services.
- **Students & Young Adults:** Young people seeking legal awareness, civic education, and guidance for first-time legal actions.
- **NGOs & Community Groups:** Organizations working on legal aid, rights awareness, and social justice initiatives.

COST STRUCTURE

AI Development Chatbot and Hosting – Expenses for building, maintaining, and hosting the AI chatbot.

Content Creation and Translation – Costs for preparing legal content and translating it into multiple languages.

Outreach, Training, and Support – Funding for awareness activities, training sessions, and ongoing user assistance.

REVENUE STREAMS

Free Public Access – Core services are available to the public at no cost, following a freemium approach.

Premium Services for Organizations – Offer advanced tools and features for NGOs and institutions on a paid basis.

Partnership and Sponsorship Support – Generate revenue through CSR funding, sponsorships, and government collaborations.
